

The Complete Natural Solution for your Hard water Problems ...

An ISO Certified

- Reduces hair fall due to Hard water
- Improves Skin health and moisture
- Balances pH, Controls bacteria and algae
- Extend life and efficiency of all your home appliances
- Increases Cloth softness, reduces detergent requirement
- Maintenance free, long life, zero running cost, fit and forget.

COSMIC NATURAL WATER CONDITIONER

30 Days Money back Guarantee

Unique Combination of
water Structuring and magnetic
2 in 1 Technology

Best Solution for Your Home and Apartments Office, Factories, Hospitals, Education institutes, Irrigation & many more

Cosmic Natural Water Conditioner

Unique Combination of Water Structuring and Magnetic two in one innovative Technology

The technology of our Cosmic Water Conditioner :

After decades of experience and feedback from our customers we have developed an unique 2 in 1 combination of structural water with magnetic technology which is the first of its kind that conditions the water naturally. The internal design of this unit is very simple, by using the greatest natural river flowing spiral motion technique, when water passes through this device very large clusters of water molecules are broken down to smaller nano molecules and also sharp edges will become blunt, this tiny blunted water mineral molecules will loose the ability to stick to the passing surface, thus water will become lighter, softer, smoother and also at the same time the water passes through an array of highly focused static power full magnetic field to influence the water molecules spatial orientation Polarized (Organized) physically changes the water molecular structures. A Calcite crystalline structure will be washed, flushed out, water stream is formed instead of a naturally occurring hard crystals, the power full magnets also create de-gasification, which decreases the smell of chlorine and increases natural taste of the water. Hence the water becomes wet and soft, because of these combination of both the process it will reduce surface tension of water by increasing its solubility.

- The ability of scaling minerals to stick anywhere is majorly reduced.
- Lower the water molecules surface tension due to micro clustering of the water.
- No more white flaky buildup, it can be easily wiped out.
- Silky, Smooth texture of water, No Salt required works on inlet water pressure.
- Maintenance free, Long life, No electricity, Zero running cost, fit and forget, easy installation.
- Reduces hair fall due to hard water, improves skin health and moisture.
- Calcium and magnesium are retained, Better lather with soap and shampoo.
- Due to de-gasification taste of water improves.
- Available in 100Lph to 1,00,000Lph which can full fill the requirement of Domestic, Industrial and Agriculture needs of hard water solution.

Water can easily be tested for its softness just by boiling before and after the use of Cosmic Water Conditioner. We can see that there is no scaling formed in the utensil with soft water i.e the water which has come out of Cosmic Water Conditioner. It is a fit and forget product. Once you install, it will last long for 20-25 years.

Note :

The product performance is based on water flow rate, kindly contact us for selecting right size and flow rate capacity of the Water Conditioner.

This is not a water filter, it will not remove or add anything to the water Water TDS and hardness remain same as inlet water.
