Unique Combination of Water Structuring and Magnetic two in one innovative Technology

The Technology of our Cosmic Water Conditioner

After decades of experience and feedback from our customers we have developed an unique 2 in 1 combination of structural water with magnetic technology which is the first of its kind that conditions the water naturally. The internal design of this unit is very simple, by using the greatest natural river flowing spiral motion technique, when water passes through this device very large clusters of water molecules are broken down to smaller nano molecules and also sharp edges will become blunt, this tiny blunted water mineral molecules will loose the ability to stick to the passing surface, thus water will become lighter, softer, smoother and also at the same time the water passes through an array of highly focused static power full magnetic field to influence the water molecules spatial orientation Polarized (Organized) physically changes the water molecular structures. A Calcite crystalline structure will be washed, flushed out, water stream is formed instead of a naturally occurring hard crystals, the power full magnets also create de-gasification, which decreases the smell of chlorine and increases natural taste of the water.

Hence the water becomes wet and soft, because of these combination of both the process it will reduce surface tension of water by increasing its solubility.

- ✓ The Ability to Scaling Minerals to Stick Anywhere is Majorly Reduced
- ✓ Lower the Water Surface Tension Due to Micro Clustering of the Water
- ✓ No More White Flaky Buildup, It can be Easily Wiped Out
- ✓ Low Maintenance, Minimum Running Cost, Long Life, No Electricity, Fit and Forget, Easy Installation
- ✓ Calcium and Magnesium are Retained, Better Lather with Soap and Shampoo
- ✓ Available in 100Lph to 1,00,000Lph Which can Full Fill the Requirement of Domestic, Industrial and Agriculture needs of Hard Water Solution

Product Dimension

| Product | A | B | Weight |
|----------|-------|------|--------|
| 100 LPH | 170mm | 48mm | 900grm |
| 200 LPH | 305mm | 48mm | 1.9Kg |
| 1000 LPH | 455mm | 95mm | 11.8Kg |

Water can easily be tested for its softness just by boiling before and after the use of cosmic water conditioner. we can see that there is no scaling formed in the utensil with soft water i.e the water which has come out from cosmic water conditioner hasn't formed any scaling, it is a fit and forget product. Once you install, it will last long for 20-25 years.

Note:

The Product performance is based on pressure and water flow rate, kindly contact us for selecting the right size and flow rate capacity of the of the water conditioner

This is not a water filter, it will not remove or add anything to the water TDS and hardness remain same as inlet water.
