# Rat Guard

## Keep the Rats away and diseases at Bay

**STOPS ENTRY OF RATS FROM DRAINS :** Rats mostly enter premises through the drainage system. When a Rat Guard is installed within the drainage system, it prevents the rats from entering your premises.

**ONE-WAY FLAP PREVENTION :** The Rat Guard allows liquids and solid waste to pass down the system and prevents rats from moving upstream.

**EASY INSTALLATION :** No prior experience is needed to install the Rat Guard. Installation can be at the exit point of the pipe. The Rat Guard fits perfectly into the drainage system

**NO MAINTENANCE :** Made of robust 316 stainless steel the device is durable and requires no maintenance and there is no possibility of the rats chewing the equipment.

**MADE IN INDIA :** The product is manufactured in INDIA with the highest standards of quality. Every part of the device is corrosion-proof and is suitable for the damp environment that prevails in the drainage system.

**TESTED FOR QUALITY :** Rat Guard is internationally acclaimed for its performance and quality. It is used by all major Plumbers and pest control organizations across the globe without any complaints.

**SIZE THAT SUITS :** The size of the Rat Guard is compatible with the variety of pipe sizes used for drainage.

**STEP-BY-STEP GUIDE PROVIDED :** A step-by-step guidance about how to use the Rat Guard is provided through literature and video.

## No entry for rats through drainage pipes

Available in  
4", 5" and 6"  
Pipe Size
